A COOPERATIVE BAR GAME

LAST CALL

How to Play · 4 players · 30–35 minutes · 8 rounds

You run a busy bar for one night. Sell drinks to earn money – but every drink makes customers tipsier and the room rowdier. Work as a team, keep things calm and get everyone home safely. **Card effects are printed on the cards: read each card aloud as you play it.**

Win together

$26+ Revenue

after Round 8. $26–27: the bar keeps going. **$28+: the bar becomes famous!**

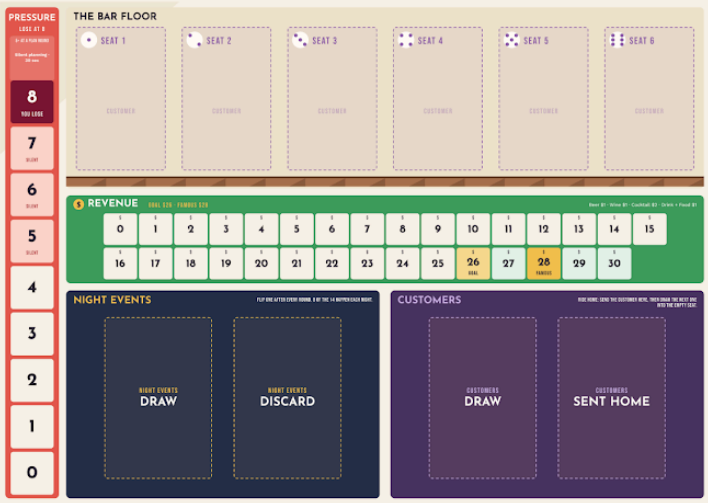

Pressure below 8

Pressure is the trouble in the room. **Reach 8 at any moment and you lose.**

Nobody at 4

No customer may be at Intoxication 4 when the night ends.

Setup

Laminated board, cards and mats: write and wipe with whiteboard pens.

1. Place the board. Mark **Revenue $0** and **Pressure 0**. Pick a **Tracker**: they update both after every card.
2. Shuffle the **10 customers**. Deal 6 face up into **seats 1–6** at Intoxication 0. The rest form the Customers draw pile.
3. Shuffle all **14 Night Events** face down on Draw. Only 8 will come out.
4. Each player takes a **role mat**, its **10-card deck** and a pen: Bartender, Server, Bouncer, Manager.
5. **Read the table** (untimed): read your role's power aloud, then all 6 **customer traits**.

Customers & Intoxication

- Intoxication goes **0 → 4**. Tick the dots on the customer card with your pen.
- Reaching **4 adds +1 Pressure** right away. Nothing goes above 4, and a customer at 4 gets **no more alcohol** (that card is wasted).
- Each customer has **one trait** – it is printed on their card.
- **Sent home:** move the card to the Sent Home pile, then draw a new customer into that seat at 0 (wipe the dots).
- **Drinks** = Beer, Wine, Cocktail, Drink + Food. **Alcohol** = Beer, Wine, Cocktail.
- Nothing drops below 0, and Revenue never goes below $0.

LAST CALL

How a round works

8 ROUNDS

Each plan covers two rounds.

1	2	3	4	5	6	7	8
PLAN + A	PLAY B	PLAN + A	PLAY B	PLAN + A	PLAY B	PLAN + A	PLAY B

1 Plan ROUNDS 1, 3, 5, 7

Each player chooses **two cards** from their hand and places them face up on their mat: **A** for this round, **B** for next round. **Round 1** is a teaching round – **no timer**, take your time.

Rounds 3, 5, 7 use the Table Timer: **Talk 60 seconds** (nothing placed yet), then **Lock-in 30 seconds** – no talking, place A and B and **write the seat number** under any card that targets a customer. A and B can't target the same seat. When Lock-in ends, plans are **locked**.

SILENT PLANNING

If Pressure is **5 or more** when Round 3, 5 or 7 starts: **skip Talk** and do only the **30-second Lock-in** – no talking, pointing or signalling. The face-up cards are your only clues.

BOUNCER - ON THE FLOOR

The Bouncer plans **card A only**. At the start of the next round, they get **30 seconds** to choose card B after seeing what happened.

2 Act EVERY ROUND

In order **Bartender → Server → Bouncer → Manager**, each player reveals this round's card (A in odd rounds, B in even rounds), **reads it aloud** and does what it says. The **Tracker** updates Revenue and Pressure after every card; tick the customer dots as you go.

If a card can't legally happen, it does nothing. A seat number means that seat, even if a new customer has sat down.

3 Night Event EVERY ROUND

Draw the top Night Event, read it aloud, resolve it, then put it on Discard.

4 Check the room EVERY ROUND

Each customer **still at 4 adds +1 Pressure** (max +2 per round). If Pressure hits **8**, you lose at once.

After an even round, played cards go to your **discard pile** – they're used up. You'll play 8 of your 10 cards in a game.

End of the night

Anyone at 4?

After Round 8, a customer still at 4 means you lose.

Under $26

The bar loses money. You lose.

$26-27

The bar keeps going. You win!

$28 or more

The bar becomes famous. Best win!

GOOD TO KNOW

- Your role's **special ability is on your mat**. "Once every 2 rounds" means once per plan.
- **The cards are the rules for each action and customer.** If this book and a card disagree, the card wins.
- **Table Timer**: yolanda699.github.io/Last-Call-Demo/timer.html – it runs Talk, Lock-in and the Bouncer's 30 seconds for you. A new customer's trait is read aloud before the next plan.
